

2024 Special Interest Programs

Norwood International High School proudly offers three special interest programs for 2024 year 7 students from both within and outside our school zone:

STEM Program

The STEM program extends, challenges and enriches students' understanding of their world through the development of STEM capabilities and the integration of authentic STEM experiences.

Italian Immersion Program

The Italian Immersion program engages students as global citizens in a unique integrated Italian and Humanities Program, developing higher levels of language competence and enhancing their intercultural capabilities.

Rowing Program

The Rowing program engages students in fitness and conditioning, team building, competition and racing strategies. The course is offered as a physical education subject in years 7-10 where students have the opportunity to develop their rowing skills as well as compete in regattas.

Please refer to www.nihs.sa.edu.au/enrolments for information related to the programs and the Year 6 application process.

Co-Curricular Opportunities

Learning extends beyond the classroom at Norwood International High School and we encourage our students to participate in all aspects of school life and many opportunities for everyone, including:

- > a range of lunchtime clubs and social action activities
- > student leadership
- > service-learning initiatives
- > international study tours and global summits
- > music bands and ensembles
- > art and media exhibitions
- > drama performances and musicals
- > pedal prix and rowing
- > a wide variety of sports and sporting competitions.

Norwood International High School is a vibrant learning community, inspiring students to create their own futures

In 2022 our school experienced a significant and exciting transformation, bringing our school community together onto one site. Our students now enjoy stunning learning spaces that promote innovation and specialisation along with an expanded international curriculum.

As Norwood International High School we continue to uphold the proud and enduring traditions of our past with a focus on academic excellence and opportunity for all students. We are committed to developing engaged global citizens and this is realised through our world class learning experiences and international accreditation.

We recognise that each student brings a unique set of skills, talents and interests with them. We value this diversity and aim to develop every student as an individual. Our students are supported by expert teachers who seek to inspire a passion for rigorous and life-long learning. They seek to actively empower our students to achieve their personal best in all aspects of learning and life.

Our graduates are ethical, enterprising and internationally minded, who care about each other and the world they live in; they are the change-makers and leaders of tomorrow.

At Norwood International High School we believe young people learn best when they feel safe, supported and encouraged

Norwood International High School enjoys specialist middle and senior schooling facilities and structures that support the unique development of adolescents and their preferred pathways.

Middle Schooling for Years 7 to 9

Our middle schooling practices and specialist learning environment foster a culture of engagement, connectedness and personalisation. Middle school learners in years 7-9 join a Connect Group and are supported by a small, specialised team of dedicated teachers within their learning community.

Students undertake a variety of subjects and experiences within the International Baccalaureate Middle Years Programme (IBMYP). This learning promotes curiosity, collaboration, global understanding and intellectual stretch, empowering our students to grow both personally and academically.

In weekly Connect sessions, the dedicated mentor teacher delivers an engaging, structured program that supports our students to develop self-confidence, build positive social skills and achieve success in their learning.

Our staff understand the complex adolescent milestones and actively work in partnership with families to maximise student engagement and achievement.

As part of our transition program new year 7 students enjoy transition days and camps promoting positive relationships and school connectedness.

Senior Schooling for Years 10 to 12

Within our dedicated senior school we build on independent learning and prepare students for further education, training or employment in a globally connected world.

Senior students may study either the South Australian Certificate of Education (SACE) or the International Baccalaureate Diploma Programme (IBDP)*. They choose from an extensive curriculum catering for a range of preferred futures and specialised learning.

Norwood International High School graduates have a reputation for achieving excellence in their studies with outstanding results and move successfully into their preferred university, vocational or tertiary pathways.

Once again, 100% of our graduates achieved their South Australian Certificate of Education in 2022.

*Norwood International High School is one of five Government Schools authorised to deliver the IBDP.
